

main.c

Share

Run

```
1  #include<stdio.h>
2  int main()
3  {
4      int bt[20],p[20];
5      int wt[20],tat[20];
6      int i,j,n,temp;
7      float awt=0,atat=0;
8      printf("Enter number of processes: ");
9      scanf("%d",&n);
10     for(i=0;i<n;i++)
11     {
12         p[i]=i+1;
13         printf("Burst Time P%d: ",i+1);
14         scanf("%d",&bt[i]);
15     }
16     for(i=0;i<n;i++)
17     {
18         for(j=i+1;j<n;j++)
```

Output

Enter number of processes: 5
Burst Time of P1: 5
Burst Time of P2: 3
Burst Time of P3: 8
Burst Time of P4: 6
Burst Time of P5: 5

Process	BT	WT	TAT
P1	5	0	5
P2	3	5	8
P3	8	8	16
P4	6	16	22
P5	5	22	27

Average Waiting Time = 10.20
Average Turnaround Time = 15.60
